Volume 32

Balder, E.J., On compactness of the space of policies in stochastic dynamic programming (1)141-150
Bally, V., Approximation models for the continuous additive functional of multidimensional Brownian motion (2)331-345
Cambanis, S. and M. Maejima, Two classes of self-similar stable processes with stationary increments (2)305-329
Chambers, D. and E. Slud, Necessary conditions for nonlinear functionals of Gaussian processes to satisfy central limit theorems (1) 93-107
Fygenson, M., A fundamental matrix for regular semi-Markov processes (1)151-160
Haan, L. de and R.L. Karandikar, Embedding a stochastic difference equation into a continuous-time process (2)225-235
Haan, L. de, S.I. Resnick, H. Rootzén and C.G. de Vries, Extremal behaviour of solutions to a stochastic difference equation with applications to ARCH processes (2)213-224
Jacod, J., Filtered statistical models and Hellinger processes (1) 3- 45
Jacod, J., Convergence of filtered statistical models and Hellinger processes (1) 47- 68
Jagers, P., General branching processes as Markov fields (2)183-212
Johnson, J.T. and G.R. Luecke, Nonhomogeneous, continuous-time Markov chains defined by series of proportional intensity matrices (1)171-181
Karandikar, R.L., *see* L. de Haan (2)225-235
Lacey, M.T., A remark on the multiparameter law of the iterated logarithm (2)355-367
Lefebvre, M., Moment generating function of a first hitting place for the integrated Ornstein-Uhlenbeck process (2)281-287
Luecke, G.R., *see* J.T. Johnson (1)171-181
Maejima, M., *see* S. Cambanis (2)305-329
Masry, E., Nonparametric estimation of conditional probability densities and expectations of stationary processes: Strong consistency and rates (1)109-127
Pakes, A.G. and P.K. Pollett, The supercritical birth, death and catastrophe process: Limit theorems on the set of extinction (1)161-170
